SUMMARY

Frontend Developer with 3+ years of hands-on experience building production web applications for Singapore-based clients. Strong in React, Next.js, WordPress custom development, performance optimization, and reusable component architecture. Seeking a frontend role where I can contribute to real products and grow as a product-oriented engineer.

SKILLS

Wordpress	Custom Themes, Elementor Advanced Custom Fields (ACF), Contact Form 7
Frontend	HTML5, CSS3, SCSS, Tailwind CSS JavaScript (ES6+), React.js, Next.js
Javascript	Node.js, React.js, Next.js
State & Data	Redux Toolkit, Redux Persist, RESTful APIs, Axios
Backend (Basic)	Node.js, MySQL, MongoDB
Tools	Git, Docker, Performance Optimization, Responsive Design

CAREER HISTORY

Personal Projects	08/2023 - Present
Independent Frontend Developer	
• Rebuilt frontend fundamentals with React, Redux Toolkit, Next.js • Developed shopping cart project focusing on state management and UX • Improved code structure, performance, and documentation	
TechVSI Company	01/2023 - 07/2023
Front-End Developer	
• Built and maintained WordPress websites for enterprise and SME clients in Singapore. • Built reusable UI components and shared libraries across React, Next.js, and Svelte projects. • Implemented responsive and scalable front-end using Tailwind CSS and SCSS. • Integrated RESTful APIs, GraphQL, and third-party services into JavaScript-based applications. • Optimized front-end performance using lazy loading and code splitting, reducing initial load time and improving user experience. • Containerized front-end applications using Docker to standardize development and deployment environments.	
Antking Company	02/2022 - 12/2022
Front-End Developer	
• Built and maintained WordPress websites for Singapore-based clients. • Optimized the codebase to reduce bugs and improve application stability, performance, and accessibility. • Collaborated closely with backend developers to integrate RESTful APIs, ensuring reliable and consistent data flow. • Implemented a component-based architecture using React.js and delivered features including authentication, role-based access control, and a to-do module for the Sidekick Admin project. • Participated in code reviews and pair programming to improve code quality and team collaboration.	
PAP Technology company	06/2020 - 12/2021

Frontend Developer (Markup)

- Built responsive website interfaces from design files using HTML, CSS, JavaScript, and Bootstrap.
- Collaborated with backend developers to integrate RESTful APIs under team guidance.
- Worked with UX/UI designers to implement user-friendly and accessible interfaces.
- Assisted in improving on-page SEO, contributing to a 30% increase in organic traffic.

PROJECTS

React Shopping Cart

01-2024 - 02-2024

Role: React Developer

Descriptions: Built a shopping cart for a mobile phone e-commerce platform using React, Redux Toolkit, Redux Persist, and Axios.

Technologies:

- **Frontend:** React.js, TailwindCSS
- **State & Data:** Redux Toolkit, Redux Persist, Axios

Responsibilities:

- Developed a React-based shopping cart using mock/fake product data to simulate real-world e-commerce workflows.
- Implemented cart logic with Redux Toolkit (add/remove items, quantity updates, total price calculation).
- Used Redux Persist to retain cart state across page refreshes.
- Simulated API interactions using Axios with mock data for product listing and cart synchronization.
- Built responsive UI components using SCSS.
- Handled loading and empty states to improve user experience.
- Simulated real-world e-commerce flow (product listing → cart → checkout state)
- Applied clean folder structure and reusable components
- Documented architecture and state flow in README

Child Education Admin

05/2023 - 06/2023

Role: React Developer

Description: Education-focused platform for managing and distributing books, instructional materials, reading programs, and multimedia learning resources.

Technologies:

- Frontend: React.js, TailwindCSS
- State & Data: Redux Toolkit, Redux Persist, Axios

Responsibilities:

- Developed and maintained reusable React components for an admin dashboard using a scalable component-based architecture.
- Integrated RESTful APIs with Axios to handle authentication and full CRUD workflows.
- Managed global state using Redux Toolkit to ensure predictable and scalable data flow across the application.
- Implemented role-based access control (RBAC) to manage permissions for different admin user roles.
- Improved UI performance by applying React Hooks, memoization, and lazy loading strategies.
- Worked closely with backend developers and product stakeholders to deliver stable, maintainable, and user-centric features.

Maxwell Reserve Singapore

03/2022 - 04/2022

Role: Wordpress Developer

Description: Developed introduce hotel and restaurant chains website

Technologies: Wordpress, Elementor plugin, ACF (Advanced Custom Fields)

Responsibilities:

- Developed and maintained custom WordPress themes and dynamic page layouts using Elementor and Advanced Custom Fields (ACF).
- Customized and extended WordPress components and Elementor widgets to meet specific design, branding, and business requirements.
- Implemented interactive UI features using JavaScript to improve user engagement and overall user experience.
- Ensured pixel-perfect and responsive layouts by validating UI accuracy against design mockups using tools such as Perfect Pixel and GoFullPage.
- Ensured cross-browser compatibility by testing across multiple devices and browsers using BrowserStack.

- Improved website performance and page load speed by approximately 25–30% based on Google PageSpeed Insights recommendations.
- Contributed to a ~30% increase in organic traffic through on-page SEO optimization.

Bado Introducetion

02/2021 - 03/2021

Role: Front End Developer

Description: Developed BADO product introduction landing page

Technologies:

- Frontend: Bootstrap 5, Jquery
- Backend: .NET Core

Responsibilities:

- Collaborated cross-functionally with UX/UI designers and marketing teams to deliver intuitive, user-friendly interfaces that support business objectives.
- Developed and consumed RESTful APIs using .NET Core to support article listing, product feature retrieval, trial user registration, and user authentication.
- Built responsive front-end interfaces using HTML, CSS, and Bootstrap, and handled asynchronous API calls with Ajax.
- Improved website performance and page load speed by approximately 25–30%, based on Google PageSpeed Insights analysis.
- Enhanced on-page SEO, contributing to a 30% increase in organic traffic and a 20% improvement in overall search visibility.
